The KRAKEN Story

The people of Cowichan have a history of stories of a giant serpent-like creature that lives in the deepest parts of the lakes, capable of swallowing whole canoes and their contents. Known as Stin-Qua. It is over 166m (50ft) in length, with a very large head, furious eyes and an enormous mouth and teeth.

The Cowichan Leader Newspaper on Thursday June 12, 1930 stated: "Is there a giant water serpent in Cowichan Lake similar to the reputed Okanogan Lake Ogo-pogo? There are of course many doubters, but the mass of evidence from reliable sources has grown to such an extent that there would appear little question about there being one or more large serpents in the waters of the lake."

Our Commitment

The VIJHL is an independent junior hockey league affiliated with the British Columbia Hockey League (BCHL), which enables us to create an environment which enhances the Junior Hockey experience for our players, team representatives and supporters. Our program places an emphasis on skill development, game acumen, hard work, teamwork and respect.

Kraken players will be positioned to showcase their skills to all 21 BCHL teams located in British Columbia and Alberta - 5 (including Powell River) BCHL teams are located on Vancouver Island. Our players will also have access to a network of contacts with other leagues and various US and Canadian educational institutions that work with our players to help advance them to the "next level"

In our first few years we have gained the respect of hockey representatives at various levels. Respective KRAKEN team members have experienced the following:
